ABOUT US

Atlas International is a global leader in the manufacturing of snack food production lines and packaging machines, with a legacy of over 50 years of excellence. Specializing in natural potato chips production lines, corn chips extrusion lines, and fully automated packaging solutions, we serve clients across the Middle East, Africa, Europe, and the Americas. Our expertise in engineering, automation, and custom-built production solutions makes us the preferred partner for investors and manufacturers worldwide.

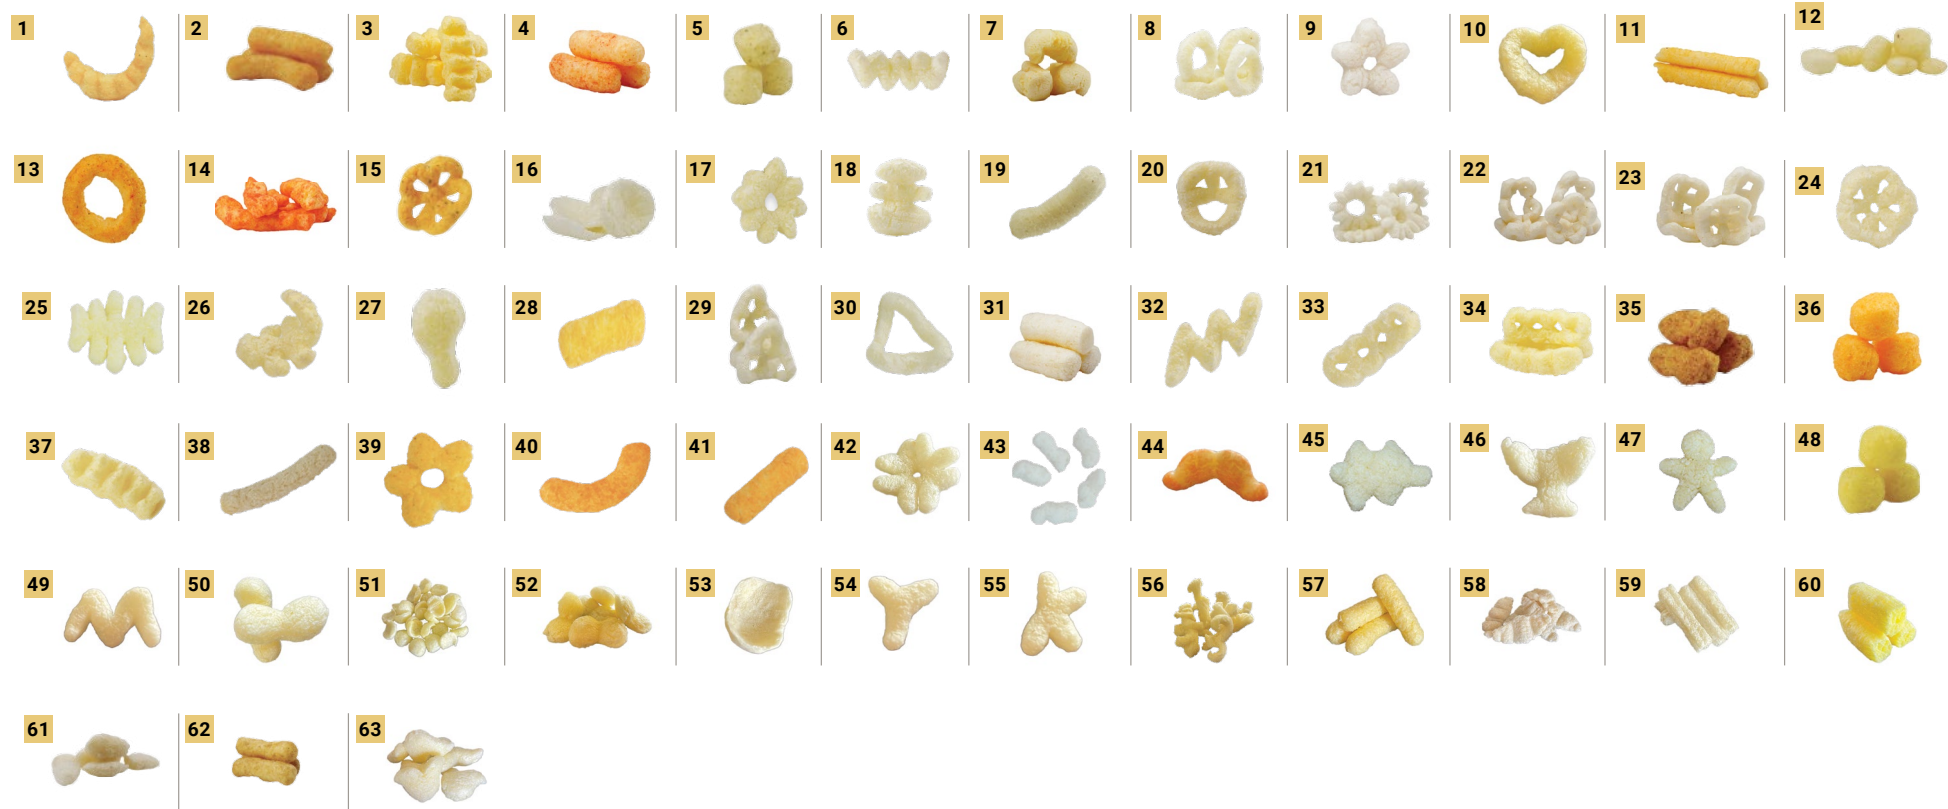

Our commitment to quality, innovation, and customer success has earned us international recognition, certifications, and multiple patents.

At Atlas, we engineer turnkey production solutions that are energy-efficient, high-capacity, and designed to maximize productivity while ensuring superior product quality.

CORN CHIPS SHAPES

ALL CORN CHIPS PRODUCTION LINE - TYPE A

CORN CHIPS PRODUCTION LINE WITH THE ADDITION OF THE CUTTING DEVICE - TYPE B

NIKNAKS CHIPS PRODUCTION LINE - TYPE C

CORN FLAKES PRODUCTION LINE - TYPE D

TWIN SCREW PRODUCTION LINE WITH THE ADDITION OF THE CUTTING DEVICE - TYPE E

PRODUCTION CAPACITY

300 kg/hour

ELECTRIC POWER

45 kw

PRODUCT SHAPES

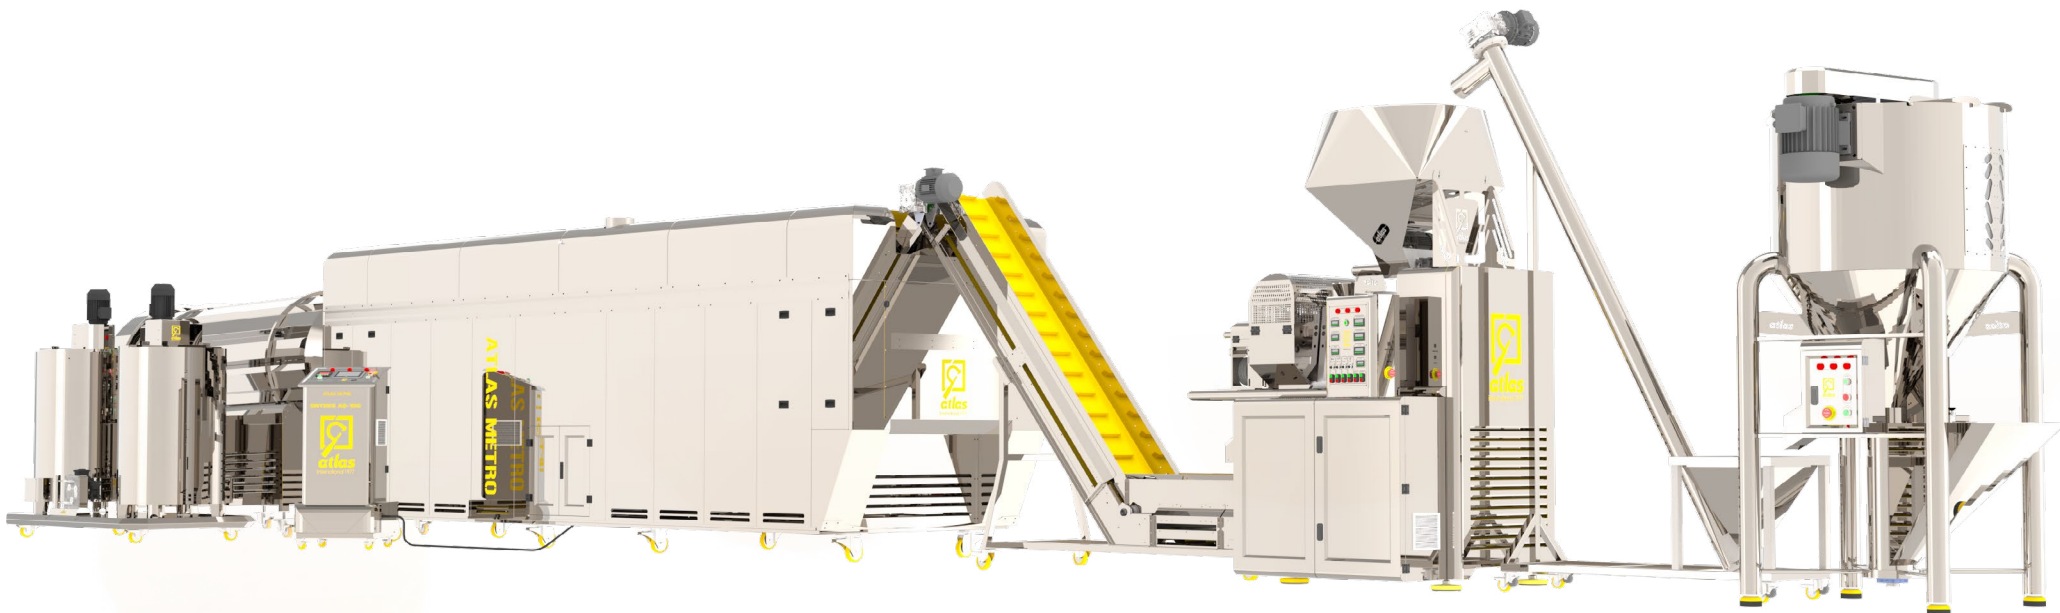

More than 50 product shapes

Corn Chips Production Line
With Three Volumetric Filling Machines

MODEL | CCL300

PRODUCTION CAPACITY
250-300 kg/hour

ELECTRIC POWER
68 kw

REQUIRED AREA
70 m²

PRODUCT SHAPES

More than 50 product shapes

DESCRIPTION ABOUT THIS LINE

1. Potato Loader: The potatoes are loaded onto the machine
2. Dosing Transport: The potatoes are transferred to the potato destoner.
3. Destoner: The dirt is extracted from the potatoes and then they are washed with water.
4. Peeler: The outer skin of the potatoes is peeled using friction from rough surfaces.
5. Slicer: The potatoes are cut into the desired shape.
6. Blancher: The potatoes are washed after cutting them.
7. Air Knife: The potatoes are exposed to high air pressure to dry them before frying.
8. Fryer: The potatoes are fried until they become crispy.
9. Inspection: The quality of the potato chips is checked.
10. Flavouring: The potato chips are flavored according to the desired flavor.
11. Packaging: The potato chips are packaged in envelopes.

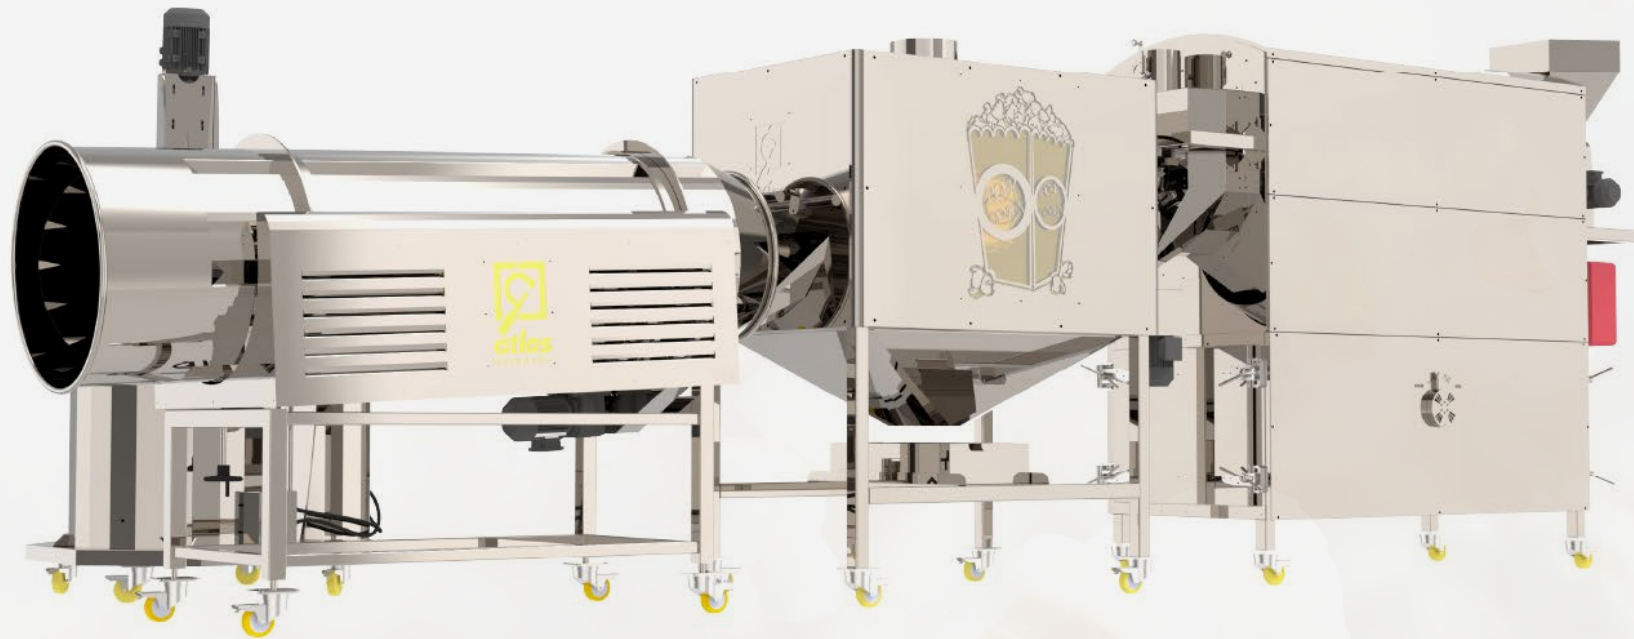

Patented Fully-Automatic Natural Potato Chips Production Line
With 5 Weighing Packaging Machines
